

Division of Advanced Water Systems Inc.

Established 1985. Thousands of systems installed nationwide.

Lifetime Automatic Soft Water Systems

Choose from industrial-grade 316 stainless steel softener tanks (shown) or heavy-duty FRP tank construction.

- **Hard Water?**
- **White Spotting?**
- **Scale Build-up?**

If you are experiencing hard water problems in your existing home or business, or are building or purchasing a new home and wish to keep your fixtures and appliances like new for years, our Lifetime Softening Systems could be just what you are looking for! Very high quality systems at reasonable prices.

Why Use a Water Softener?

If your water contains over 8–10 grains (or 170 ppm of calcium carbonate) of hardness minerals per gallon, softeners will provide these cost saving benefits:

- Eliminate or dramatically reduce white spotting on fixtures and dishware.
- Prevent scale and calcium build-up inside pipes, water heaters, fixtures, appliances.
- Counteract drying effects of hard water and enjoy softer skin and hair.
- Save on laundry: clothes come out cleaner, softer without chemicals, bleach or detergents. Clothing lasts longer.

CLEAN SOFT WATER THROUGHOUT THE HOUSE

How Do I Know What Size I Need?

Pick a system with a pipe size that is not less than the pipe size of your water service (at the shut-off to your house). Choose by gallons per minute of flow (listed as GPM in the price list)

- 1-2 Bathrooms = 10 to 18 GPM
- 2-4 Bathrooms = 15 to 24 GPM
- Over 4 Bathrooms: 28 - 38 GPM

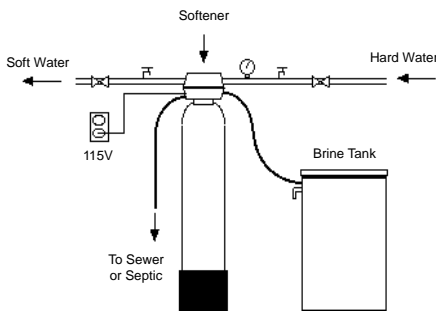

Hundreds of other sizes for residential, commercial and industrial applications available!

Single-Tank System

Twin-Tank System

Choose from four styles:

FRP Tank: single softener plus brine tank.

FRP Twin Tank: twin tank continuous-duty softener

Stainless Steel Tank: single stainless steel tank plus brine tank.

Stainless Steel Twin: twin stainless steel tanks.

All systems include heavy-duty commercial-style poly brine tank. Metered-flow control valve counts gallons used and regenerates softening media after a preset number of gallons have passed through the system, saving salt and water. All FDA materials. Uses either standard sodium salt or potassium chloride salt.

FRP Tank Softeners

GPM	Cu Ft/ Media	Capacity KiloGrains	Brine Tank	Pipe Size	Floor Space	Height	Part #	Price \$\$

Additional information: Above items are 115v models. Also available in 24v, and 220v 50 hz. For use on disinfected water only. Lifetime warranty on filter tanks and media. 3 year warranty on control valve. Installation not included in above pricing. Plus sales taxes where applicable. Flow rates shown above are peak flow rates, based on a pressure drop of 25 psi at the peak flow rate. Actual flow rates will vary based on water temperature and pressure. Flow rate recommendations and installation data is provided for as a help in sizing; actual applications and installation could vary, no warranty or guarantees are expressed or implied regarding this information. All 3/4" and 1" units come with heavy-duty bypass valve. For other units, a bypass should be installed using ball or gate valves. Always follow all local plumbing and electrical codes when installing, including installing an air-gap on the drain line connection. For more information see the installation manual.
